

Willemstad – Netherlands Antilles, February 23rd 2022

Due to increased congestions in North America, Seacat line will implement a North America Congestion Surcharge for all containers between Central America and the United States, valid as from March 1st, 2022 in the following amount: U\$ 100/TEU - U\$ 200/FEU any type.

Simultaneously Seacat Line and our trucking partners in the USA would like to remind clients that trucking costs have seen dramatic increases. The US carriage cost is charged to the Shippers at cost for Seacat Line. Although we try to minimize the costs for our clients, as a result of a limited availability of trucks, trailers, gensets and drivers, the US trucking rates continue to rise. Our trucking partners have informed us of another imminent cost increase. As Seacat Line is offering this service at cost, we do need to pass these on to our clients.

Seacat Line will inform customers immediately upon receiving such notifications, and by placing the booking, the Shippers confirm their acceptance to the trucking rate increase.
